

Future-proof your investment with full-fibre broadband.

Improve connectivity for residents and increase the earning potential of your property with a free, standard installation of our ultrafast broadband.

Truly better broadband for flats and apartment buildings.

Take advantage of this opportunity to upgrade your property's connectivity. Install ultrafast, full-fibre broadband at no charge, and make the most of:

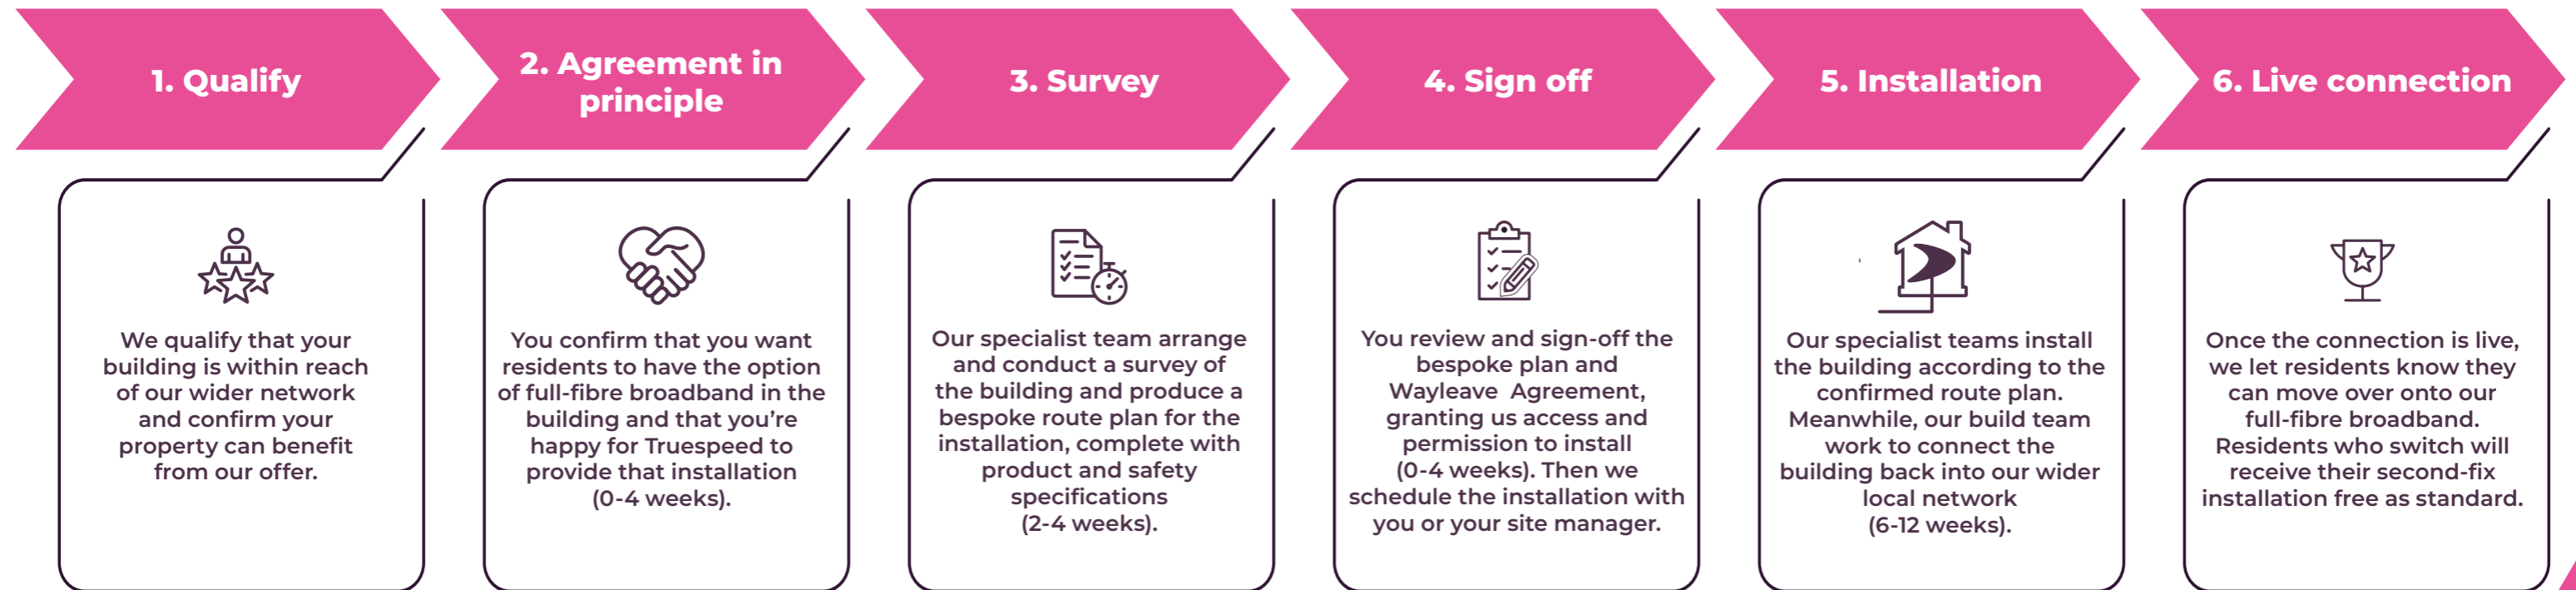

- **A quick, safe, and considerate installation** from a team of expert engineers.
- **Industry-leading apparatus**, designed to be barely visible once installed.
- **A fast, hassle-free turnaround** for you and your residents, delivered by a dedicated team assigned only to you.
- **Greater choice** for both current and future residents.

Other fibre providers may eventually extend their network to you in the future, but why risk the wait and their possible installation charge?

Get a Truespeed full-fibre connection in your property and discover truly better broadband today.

Six steps to Ultrafast Connectivity

Installing our full-fibre broadband into your property couldn't be easier with our simple, six-step process:

"A very prompt installation, I can report that the service has continued to be 100% as stated in their contract and would highly recommend."

If you own or manage a property

-  **Confirm your interest.** Let us know you're interested in installing our full-fibre broadband at your property, free of charge. Our network build moves quickly, so make sure to let us know as soon as possible.
-  **Prepare for success.** Point out any other decision-makers, site personnel, or special site-specific considerations we should know about while conducting our survey and installation.

If you are a resident

-  **Let your building owner/manager know of our offer and your interest** in getting full-fibre to the property. A digital version of this leaflet is available on our website at: truespeed.com/apartments
